October 7, 2011

Dear Members of the Community,

You may already be aware that Highway 50 will be resurfaced in the summer of 2013. The project will be quite extensive and last between four and five months. Currently the Department of Transportation (DOT) is soliciting input from all parties interested in the project. I feel we have an important opportunity to influence the DOT to add some important safety measures to the intersection of Highway 50 and Snake Road.

The project includes adding right and left turn lanes in both directions. However, when speaking to the project designers at a recent meeting in Williams Bay, they were unaware of the heavy traffic that occurs several times during the day at the intersection. If you take the time to explain to the DOT some of your experiences at our intersection at drop-off and pick-up times, it may be possible to influence them to signalize the intersection during those key times. When I inquired why this hasn't been in the planning, I was told that there have not been enough serious accidents at the intersection to warrant a timed signal. I am sure you feel the same as I do and would like to be proactive in this situation and to try and prevent any serious accidents at the intersection.

We were informed that the amount of input that they receive can be influential. So, I believe if we take the time to let the DOT know about the situation at the Snake Road and Highway 50 intersection between 8:00AM and 8:45AM and also between 3:00 PM and 3:45 PM we can help to insure the safety of our families in the future. It may also help to mention the early release days between 11:00 AM and 11:45 AM. If this is something you feel that you can do, please use the enclosed form to share your opinions and experiences with the DOT.

Sincerely,

Ed Brzinski, District Administrator

Effort Breeds Excellence
